

PT-100 ohm TEMPERATURE SENSORS

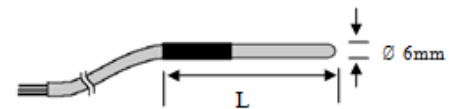

PT-100-VE RESISTANCE ELEMENT

Small size special temperature element for special applications. Resistant element 2x2 mm. Equipped with teflon insulated cable, length 200mm.

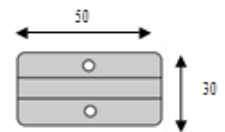

PT-101 CAPSULE SENSOR

Sensor for general applications e.g. liquid temperature measurements in baths and tanks. Acid resistant enclosure tube, with 2 m connection lead and water resistant shrink sleeve, 2 or 3 wire connection.

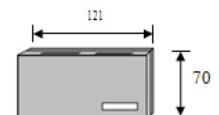

LO-1 SURFACE BRACKET

For securing sensors to surfaces or pipes for temperature measurement (screw or band fixing).

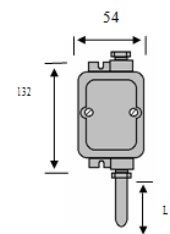

PT-102 ROOM SENSOR

For air temperature measurements in dry conditions with plastic protection and connection box.

PT-103 WATERPROOF AIR SENSOR

For measurements of air temperatures outside and in damp conditions (e.g. stores and greenhouses). Aluminium alloy connection box with acid resistant enclosure and at the of it placed element for the measurements.

PT-104 DUCT-SENSOR

For the measurement of air and gas in ducts. The enclosure tube and the flange fixing are made of acid resistant steel. The class of aluminium alloy box is IP67 and cable leading through PG11. Immersion depth 150 mm and 250 mm.
