

NEW SMALL GDU-A PRESSURE MONITORING/DATALOGGER

GDU-A helps the operators to set up and test the enclosure before work starts and gives warning if insufficient pressure is being maintained. It also provides a record of the pressure over the life of the project.

- DESIGNED AND MANUFACTURED IN FINLAND
 - ACCURATE MEASUREMENT OF PRESSURE
 - BUILT IN GRAPHICAL DISPLAY
 - WIDE SAVING MEMORY - EVEN 32 Mb
 - EQUIPPED WITH ALARM LIGHTNING OF VACUUM
 - POSSIBILITY TO ATTACH A PLASTIC TUBE WHICH CAN BE USED TO ATTACH PRESSURE MEASUREMENT EASILY TO THE TARGET OF MEASURING
 - INCLUDING PC PROGRAM FOR DATA SAVING AND ANALYSING
- THE METER IS ALSO AVAILABLE WITH:**
- TEXT MESSAGE TO DESIRED NUMBER
 - REMOTE READING BY GPRS
 - AVAILABLE ALSO EXTERNAL ALARM LIGHT

Measurement range	-500+500 Pa, accuracy 3,0 %, 0-point accuracy 0,2 Pa No need to zeroing or no dependency of position.
Display	Graphic display 128/64 pixels with back up light. Pressure display in Pascale, resolution 0,1 Pa
Memory	200 000 measurements outcomes (1,2 milj. option)
Text	12 ASCII signals
Saving	1 sec...2 h
Email rate	1 sec...45 days
Alarm	Internal err-light, 24 VDC; 0,1 A start for external alarm flashing light
Extra equipment	Plastic tube can be attached. There is also a possibility to attach external alarm light to the meter.
PC Program	Meslog D- Lite A
Case	66x98x41 mm. plastic
