

GD-10L MANOMETER FOR DIFFERENTIAL AIR PRESSURE MEASUREMENTS

- **MEASURING RANGE -500...+500 Pa**
- **GRAPHIC LCD DISPLAY**
- **0-POINT ACCURACY 0,2 Pa**
- **NO NEED TO RESET**
- **NO DEPENDENCY OF THE POSITION**
- **Li-Ion BATTERY POWERED**

GD-10L is economical battery powered instrument which because of the excellent measuring features is an outstanding meter for applications where precision low pressure difference measurement and data logging is needed.

Product Applications:

- Air velocity monitoring, when used with a Pitot tube
- Monitoring or troubleshooting HVAC system

SPECIFICATIONS

<u>Display</u>	Graphic LCD display for pressure difference and for square root of pressure difference with one decimal
<u>Accuracy</u>	0-point accuracy 0,2 Pa
<u>Measuring range</u>	-500...+500 Pa
<u>Tube connection</u>	pressure port for 4 mm tube
<u>Memory</u>	300 000 measures
<u>Housing</u>	Gray plastic 70x130x30 mm
<u>Power</u>	Li-Ion rechargeable battery

**EXCELLENT MEASURING
ACCURACY
OFFSET FREE
HYSTERESIS FREE**
